LLD: All Structural Design Patterns

"Concept && Coding" YT Video Notes

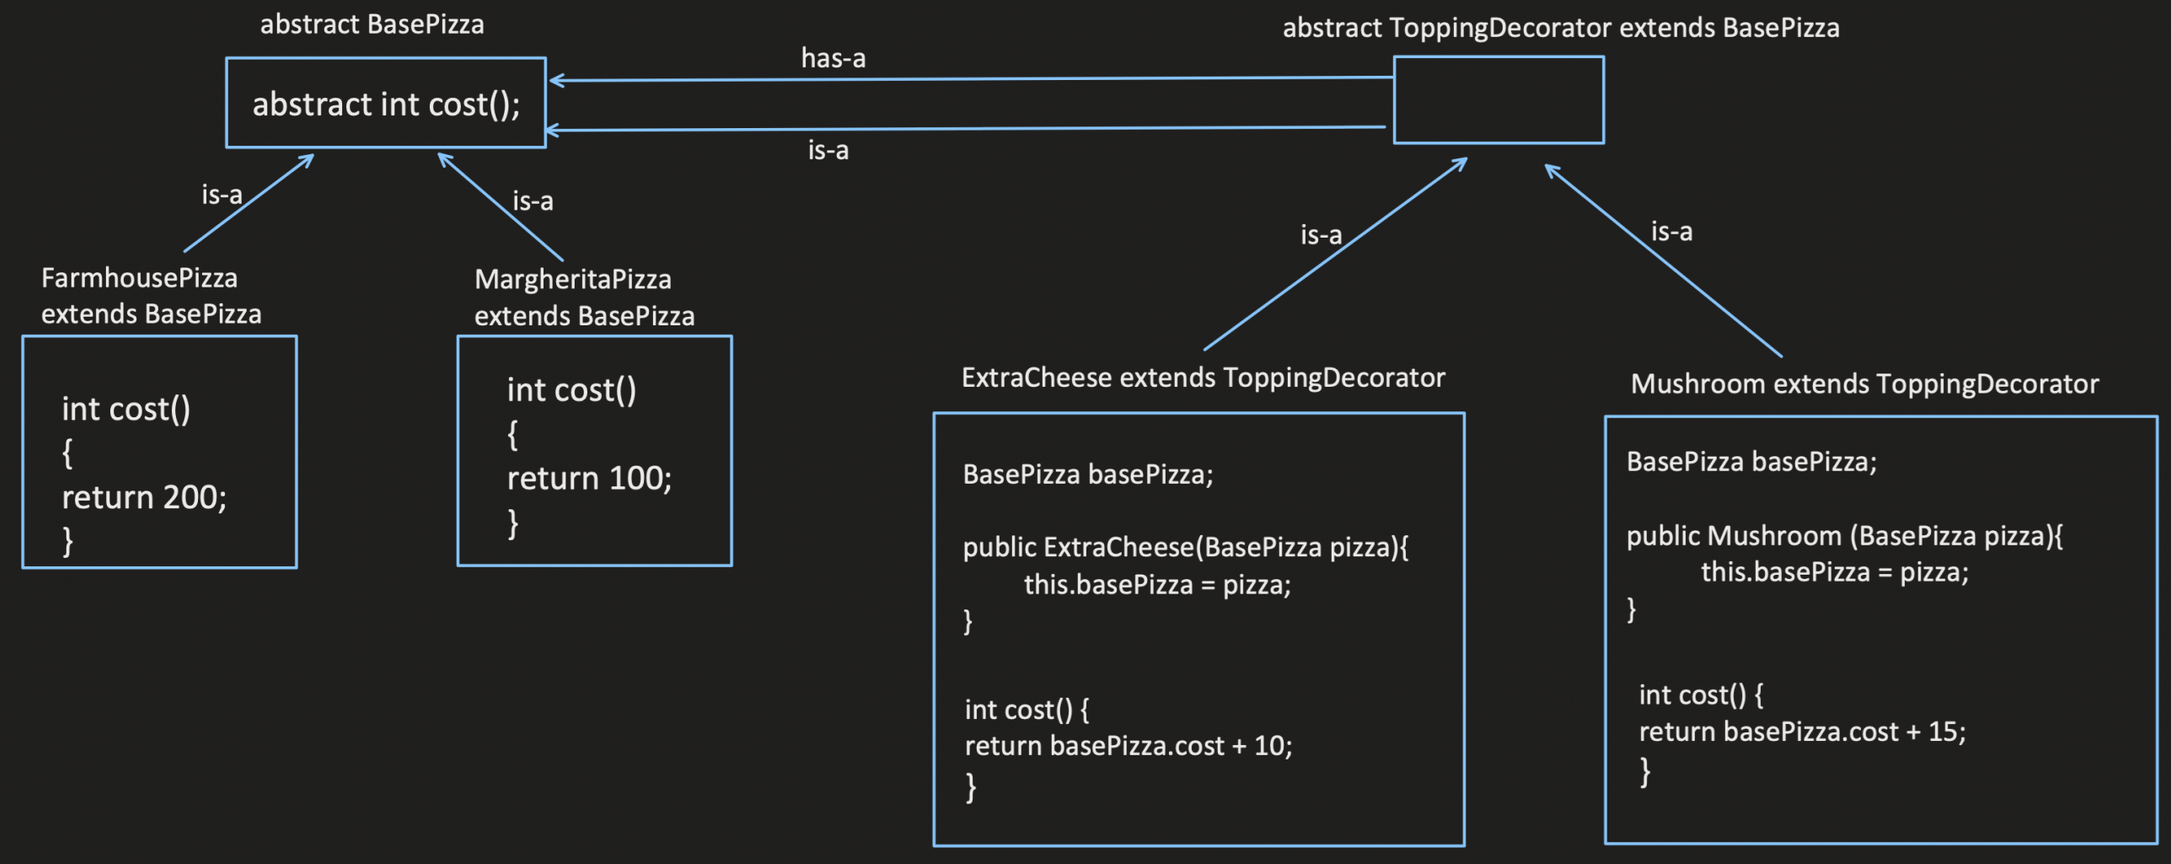

Structural Design Pattern is a way to combine or arrange different classes and objects to form a complex or bigger structure to solve a particular requirement.

Types:
---

1. Decorator Pattern
2. Proxy Pattern
3. Composite Pattern
4. Adapter Pattern
5. Bridge Pattern
6. Facade
7. Flyweight

1. Decorator Pattern:

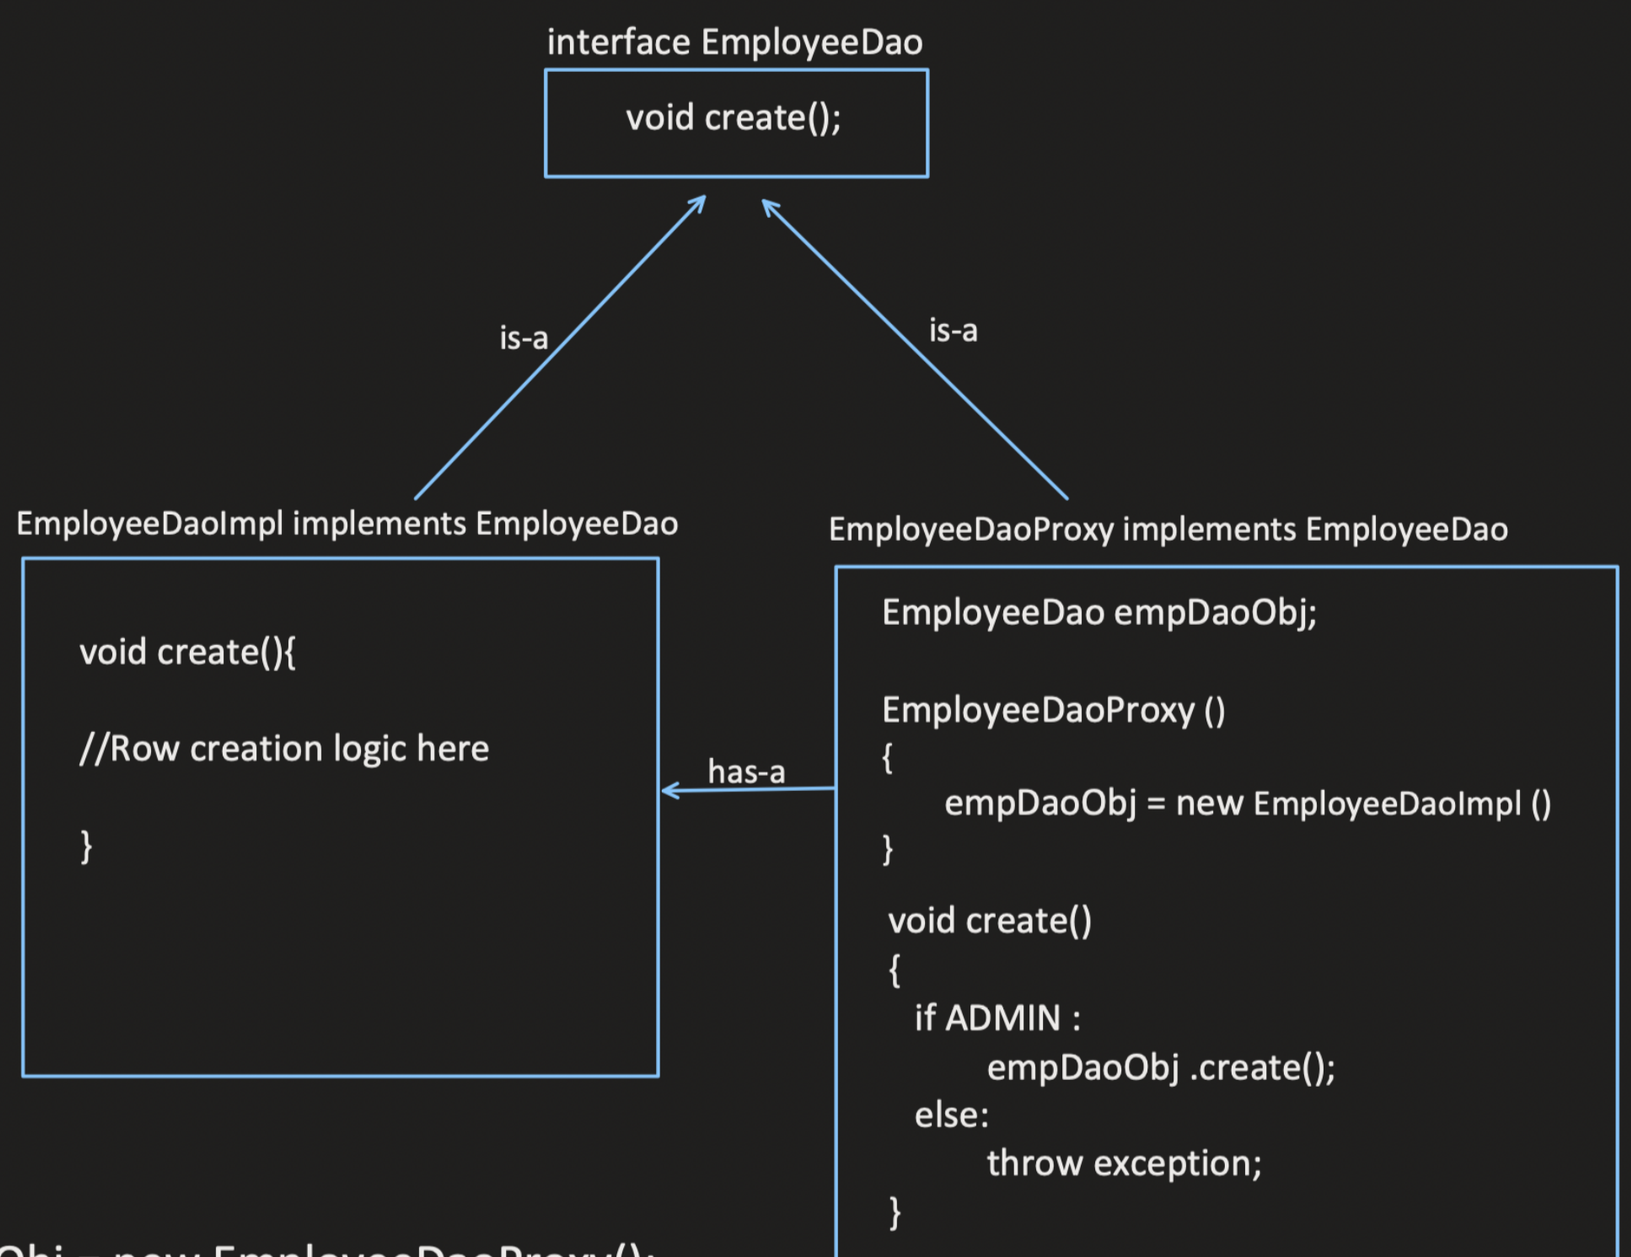

This pattern helps to add more functionality to existing object, without changing its structure.

BasePizza pizza = new Mushroom(new ExtraCheese(new Farmhouse()));

2. Proxy Pattern:

This pattern helps to provide control access to original object.

EmployeeDao empProxyObj = new EmployeeDaoProxy();
empProxyObj .create();
